PROFESSIONAL SUMMARY

Automation and Robotics Engineer specializing in programming, robotics integration, and sensor technology to optimize control systems and processes. Experienced in software debugging and root cause analysis. Focused on driving innovation and efficiency through seamless integration of advanced automation solutions.

WORK EXPERIENCE

Aug 2025 – Presente

Software and Automation Engineer, *Preh Portugal*

- Spearheaded the integration of automation software using C#/.NET, improving system reliability and maintainability.
- Developed and optimized control logic in Beckhoff TwinCAT 3 PLCs for industrial automation applications.
- Implemented industrial vision solutions using Sensorpart systems to enhance quality control processes.
- Collaborated within cross-functional teams using Git for source control and continuous improvement.

Sep 2024 – Aug 2025

Automation and Robotics Engineer, *Bosch Car Multimedia*

- Programmed and deployed collaborative robots for industrial automation applications.
- Contributed to an innovation project for the design and implementation of a robotic system to supply manufacturing lines, improving automation efficiency.

EDUCATIONAL HISTORY

Sep 2019 – Oct 2024

Industrial Electronics and Computers Engineering, *University of Minho*

MSc in Control, Automation and Robotics & Microtechnologies

SKILLS AND EXPERTISE

- Software debugging and root cause analysis
- Troubleshooting
- Team collaboration
- Robotics Integration
- Process Optimization
- Sensorpart Vision Integration
- C#
- SQL
- Beckhoff TwinCAT 3
- PLC programming
- ROS2
- Universal Robots programming
- C++

HOBBIES

Boxing, Gym, Padel, Soccer, Motorcycling, Travel
